## DETAILS

An upfront billing of \$200 is required. Additional expenses will be invoiced to the client before filing the return.

For tax returns with depreciable property, there's an initial charge to set up the depreciation schedule. This service is subsequently offered at no extra cost in the following years.

Revisions - If we prepare your return based on the information you've provided as complete, and later provide additional information, a supplementary charge of \$50 will apply. This covers the added time required on our behalf.

Reporting crypto transactions can be intricate and time-consuming if you lack a 1099 due to custodian limitations. Contact us for a detailed quote if your transactions exceed 250. Prices will reflect the complexity of your unique situation.
